DRAW A DREAM

OBJECTIVES

1

Foster Creative Expression

Empower students to explore and communicate their imagination through structured art instruction and drawing activities.

2

Develop Artisanal Skills

Students are able to develop skills such as to create, explore, be expressive, and imaginative.

3

Provide Educational Resources

Distribute essential learning and art supplies, including multimedia presentations, crochet materials, and drawing templates, to ensure project success.

Scope of Work

Event Overview: "Draw a Dream"

Phase 1: Student Creative Workshop

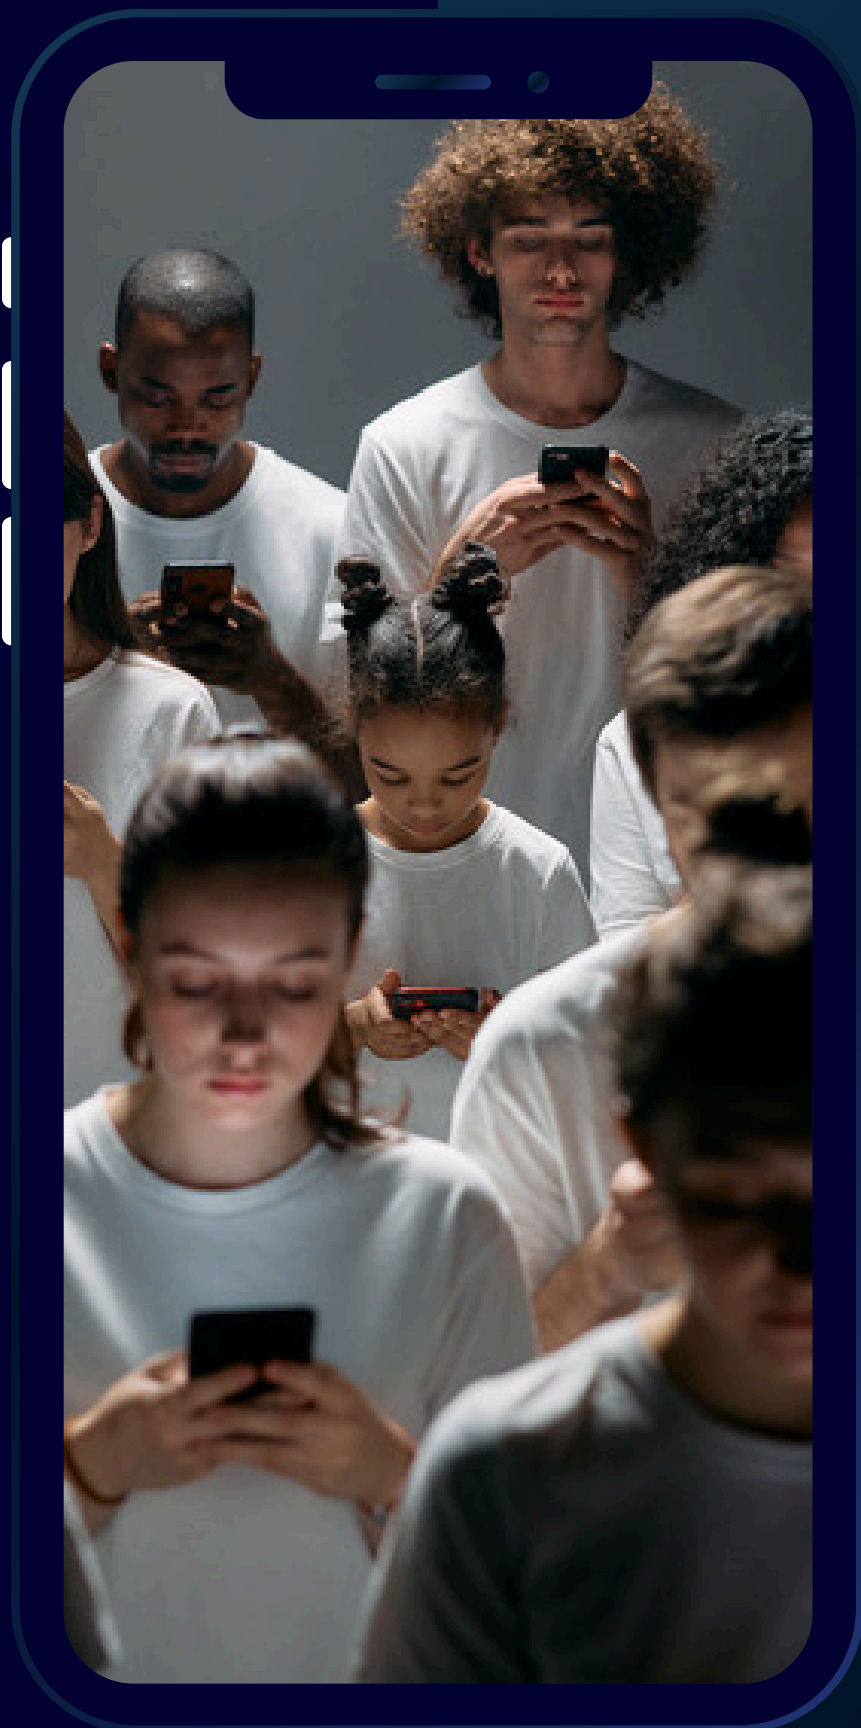

- Art Instruction
- Material Provision
- Draw a Dream Activity
- Interactive Coloring

Phase 2: The Transformation (Production)

- Design Matching
- Handcrafting Session
- Quality Support

The Goal

- To empower students through creative expression, ultimately turning a child's imagination into a tangible, handcrafted reality.

Un-scroll: Breaking the Loop of Dopamine farming

- ➔ A Seminar on Digital wellness: Understanding "Dopamine Farming" and Student Health in Brgy.183, Villamor, Pasay City
- ➔ A collaboration of NATSER students and ICPeP.SE APC

Background

This educational seminar examines how digital devices have fundamentally changed the landscape of modern childhood. While technology provides valuable tools, we will explore the critical impact of sedentary lifestyles and the decline of face-to-face social interaction among students.

The Problem

Alarming Local Statistics

Vulnerability of Children

Severe Health Impacts

Objectives

To increase awareness of cognitive "Dopamine Farming"

To enable multidimensional symptom identification

To promote a commitment to "appropriate use"

To discuss the challenges of digital dependency

Digital Literacy for Residents of Brgy. 183, Villamor, Pasay City

A Collaboration of NATSER students & ICpEP.SE APC

Click Wise, Iwas Scam.

Online safety starts with you.

Brief Background

About

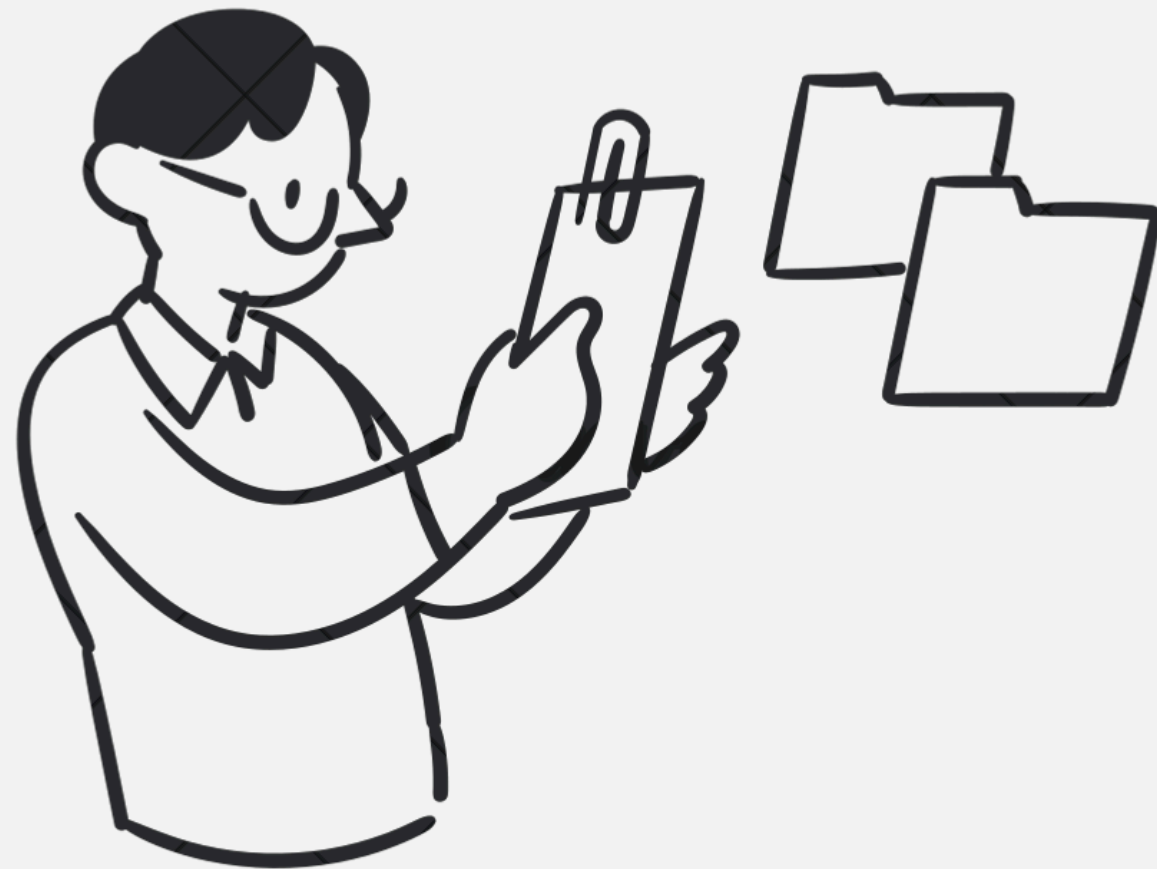

- Rapid growth of digital technology has changed how people communicate, shop, and conduct financial transactions.
- However, this also increases exposure to cyber threats such as phishing, SMS scams, fraudulent links, and identity theft.
- Many community residents have limited digital literacy, making them more vulnerable to online scams.
- This outreach program aims to raise awareness and improve digital safety knowledge among residents of Brgy. 183, Villamor, Pasay City.

Current Gaps and Key Issues

With the **increasing reliance** on digital platforms and mobile communication, many individuals fall victim to phishing and scam attempts through:

- ☐ Suspicious SMS messages
- ☐ Fraudulent website links
- ☐ Fake online promotions
- ☐ Social media scams
- ☐ Identity theft attempts

A **lack of awareness** and digital literacy makes residents more **vulnerable** to these threats. Therefore, there is a need to educate the community on how to identify and avoid such cyber risks.

The Problem

Objectives

To promote digital literacy and cybersecurity awareness among residents of Barangay 183, Villamor, Pasay City.

Target Audience

Residents aged 13 and above

Specific Objectives

- ☐ To **educate** residents about common online scams and phishing techniques
- ☐ To **teach** residents how to identify suspicious links and messages.
- ☐ To **promote** safe online practices when using mobile phones and the internet.
- ☐ To **empower** residents with knowledge to protect their personal information online.

Q & A
